Chandran Double Ball Spike

Designed by Rama E. Chandran, MD

Designed to help rotate and control a butterfly bone fragment for fixation

PRODUCT NO:	
8027	
Overall Length: 12.5" (31.8 cm)	
Handle Length: 4.625" (1,17 cm)	

Modified Short Tip Fat Pad Retractors

Designed by Robert Wubben, MD, with modification by Mojib Manzary, MD, FRCS

Designed to help with soft tissue and fat pad retraction in the smaller knee, the blunted, shortened end of the pointed keel helps provide protection against bony perforation

PRODUCT NO'S:

3217-L [Large]
Overall Length: 9.75" (24,8 cm)
Prong Length: 13 mm

3217-S [Small]
Overall Length: 9.75" (24,8 cm)
Prong Length: 13 mm

Rosenstein Forked UKA Tibial Fragment Grasper

Designed by Alexander D. Rosenstein, MD

Used to help remove the tibial bone fragment during UKA, the forked upper jaw design helps the instrument to fit around a femoral condyle while the thin lower jaw slips through the osteotomy site

The reverse-angled teeth under the upper jaw firmly grip the tibial fragment through its entire length, allowing removal of the fragile wafer of tibial bone without breaking it. This unique design helps deploy the instrument in tight medial or lateral compartments of the knee joint. The angled design keeps the surgeon's hands out of the way and facilitates visualization.

PRODUCT NO:

1720-02
Overall Length: 10" (25,4 cm)
